

How do I delete projects from Pocket Dlog?

- Go to START
- Then PROGRAMS
- Then click on FILE EXPLORER (File Explorer may be under the Start Menu)
- Under The Words File Explorer there is a down arrow, click on the down arrow and click on My Device / Built In Storage
- Now click on LOGPROJECTS
- You now should be able to see the project you want to delete, Hold Down on the Project Name, and hit DELETE.
