

What do I do if my labels are gone in ViewPoint?

There are two things to check:

- First thing (most common) Go to VIEW> Labels> ALL DISPLAYED DATA> ON
- If that does not bring the labels back then be sure that you add the labels by going to the Drawing Layer, by right click on the layer, then Tools, and then Labels, and Add.
- If you added your labels by going to Map then Sketch, and Labels, this is only TEMPORARY and when you close ViewPoint they will be erased.
