

Converting Files

Downloading Pocket Converter

- Go to www.deltadatasystems.com/dlog and select the link for Pocket Converter.
- In this screen it says "Download Pocket Converter", left click on Pocket Converter.
- A screen will pop up select Save, Then save this to the Desktop.

Converting

- Open Pocket Converter on the desk top by double clicking on Pocket Converter.
- You can retrieve your files one of two ways,
 - First way is to sync you Handheld to your computer through Microsoft Active Sync, the file within your LOGPROJECTS folder on you Handheld will appear in the white box.

- Second way is to select your files that have already been saved to your computer.
- 
- Beside Import Folder click Browse and go to where you have saved your data (e.g. C:/Tile Maps/John Smith Farms) and click open.
 - Your files will appear in the white window.
- Now you must select a folder to save the converted files in, beside the export folder click browse, and go to where you wish to save these files. (e.g. C:/Tile Maps/ John Smith Farms)
 - In the Export Type Window hit the down arrow and select the format you wish to convert to.

- Now select the files you wish to convert within the Pocket Dlog Files window. And click Reformat.
- Wait for the blue bars to cross at the bottom, and when they do you files are converted and waiting in the folder you selected.
